24
..

C_1 31 27 99 ab 41 86 73

Attacker tries
until oracle
says OK

OK

C_2 b3 41 79 88 2f ae 27 51

The oracle does
this decryption...

... and checks this.
letting attacker know
if padding OK (only).

old trial
Now compute $22 \oplus 21 \oplus 01 = 02$
